Analytical and computational methods in electromagnetics	CDR 04101	This authoritative resource offers a clear and complete explanation of this necessary electromagnetics knowledge, providing the analytical fundamentals needed to understand the most important methods in the field, including MoM (method of moments), FDTD (Finite Difference Time Domain) techniques, and Green's functions. The cd presents all math necessary to master the material and provides number of solved problems to ensure the understanding the key concepts	 <p>AUTHOR: Ramesh Garg YEAR: 2008</p>

<p>Complete wireless design</p>	<p>CDR 04006</p>	<p>System from the ground up instead of relying on a simple plug-in selection of circuits to be modified. Avoid an arduous trek through theory and mathematical derivations. Cotter Sayre's Complete Wireless Design is the handbook that fits your needs. It covers wireless hardware design more thoroughly than any other—and does it without burying you in math.</p>	 <p>AUTHOR: Cotter W. Sayre YEAR: 2008</p>
<p>Introduction to 80x86 Assembly Language and Computer Architecture</p>	<p>CDR 04270</p>	<p>Introduction to 80x86 Assembly Language and Computer Architecture provides students with a clear and concise introduction to the inner workings of the computer, and their many levels and functions. Through introducing real instruction sets and writing real assembly language programs, students will become acquainted with the basics of computer architecture.</p>	 <p>AUTHOR: Richard C.
